yellow hawkweeds, invasive	3	3	2	3	2

Species ranks that are in **white** indicate the species is **NOT known to exist** in that sub-region (i.e. if black, the species is present). An **N/A** indicates that this species is not ecologically suited to that given sub-region and is not expected to occur there.

Footnotes: 1. Provincial EDRR species. 2. Biocontrol agent is present on dry sites, but not yet effective; it is effective in the TNRD near Canoe Creek. 3. Biocontrol agent is the primary means of control. 4. Biocontrol agent is present, but not yet effective. 5. In the Canoe/Dog and Churn Creek areas, the species is mainly controlled by biocontrol agents. 6. Species of growing concern in Williams Lake area. 7. Biocontrol appears to be affected by a parasite. Most sites are treatable.
