tansy ragwort	1	1	1
yellow flag iris	1	1	1
yellow hawkweeds, invasive	1	3	1

Species ranks that are in **white** indicate the species is **NOT known to exist** in that sub-region (i.e. if black, the species is present). An **N/A** indicates that this species is not ecologically suited to that given sub-region and is not expected to occur there.

Footnotes: 1. The Outer Coast has not been inventoried for invasive plants. 2. Provincial EDRR species. 3. Identification is unconfirmed. 4. Biocontrol appears to be affected by a parasite. Most sites are treatable.
